THE PATENTED ROTATING VEHICLE PLATFORM

Turn your vehicle into the center of attention.

PATENTED · MANUFACTURED IN DÜZCE, TÜRKIYE · 800+ INSTALLATIONS ACROSS 75+ CITIES AND 12 COUNTRIES

DECEMBER 2019 · TOGG LAUNCH

A nation's eyes were on a single point. That point was *us*.

When **TOGG** — Türkiye's first domestic automobile — was unveiled live to the nation, the rotating platform at the centre of the stage was a **YılPlat**.

The presidential protocol, the manufacturer's board, and millions of viewers all watched the same stage. At the centre of that stage was a single rotating platform with eleven panels. When the event ended, it was disassembled, crated and shipped — leaving only the floor behind.

YılPlat is the platform of choice for Türkiye's most significant automotive launches.

STAGE · LIVE BROADCAST

PROTOCOL · OPENING

PUBLIC UNVEILING

FULL SERIES REVEAL

Eight reasons it is on every premium showroom floor in Europe.

Each **YılPlat** ships with a **two-year manufacturer's warranty**, a single 245 × 145 × 85 cm crate, and the certainty that no floor will be touched.

①

Zero floor modification.

The platform sits **on** the existing floor — never **in** it. Distributes load and protects parquet, marble, concrete, stone or tile.

②

Installed in 2.5 hours.

Two technicians, hand tools, a single 13 A socket. No drilling, no welding on site. From pallet to first rotation between morning coffee and lunch.

③

Fully removable — 45 minutes.

Modular trapezoidal segments unbolt by hand. The platform travels back to the next venue in the same crate it arrived in. No reinstatement bill, ever.

④

Patented, 5-tonne rated.

From a Mini Cooper to a Rolls-Royce Phantom Extended. The platform's load capacity comfortably exceeds the heaviest production luxury vehicle.

⑤

Only 8.5 cm tall · 6 × 6 m is enough.

The lowest profile of any 5,000 kg-rated rotating platform on the market. A **6 m × 6 m** floor area is more than sufficient for any vehicle to rotate freely. Ramps slope down to floor level — no kerb.

⑥

Eleven finishes, your colour.

Five standards, six trend-led options including Mocha Mousse and Polished Walnut, plus any RAL or Pantone on request. Logo laser-etched, inlaid or wrapped.

⑦

2-year warranty & 11 years of references.

Specified by Ferrari, Porsche, Mercedes-Benz, BMW, Toyota, Bentley. 800+ installations across 75+ cities in Türkiye and 12 European cities. All spare parts in stock.

⑧

90% more attention.

A moving object holds the eye 90% longer than a stationary one. Independent retail studies confirm rotating displays drive measurable dwell-time uplift.

Same outcome. Different premise.

Traditional vehicle turntables require a **pit, three-phase wiring, structural anchors and weeks of construction**. The YılPlat does not. The result is the same — a vehicle rotating in front of a customer — but the path is six figures cheaper, four months faster, and entirely reversible.

FEATURE	YILPLAT	TRADITIONAL TURNTABLE
Floor modification	**None. Sits on existing floor.**	Pit excavation, ring beam, structural anchors
Installation time	**2.5 hours · two technicians**	2 to 6 weeks · structural crew
Lead time, order to trading	**20 working days**	3 to 6 months
Removable / relocatable	**Yes — 45 minutes**	Permanent
Load capacity	**5,000 kg**	1,500 to 2,500 kg typical

CHAPTER II · THE ANSWER

A platform that sits *on* the floor, not *in* it.

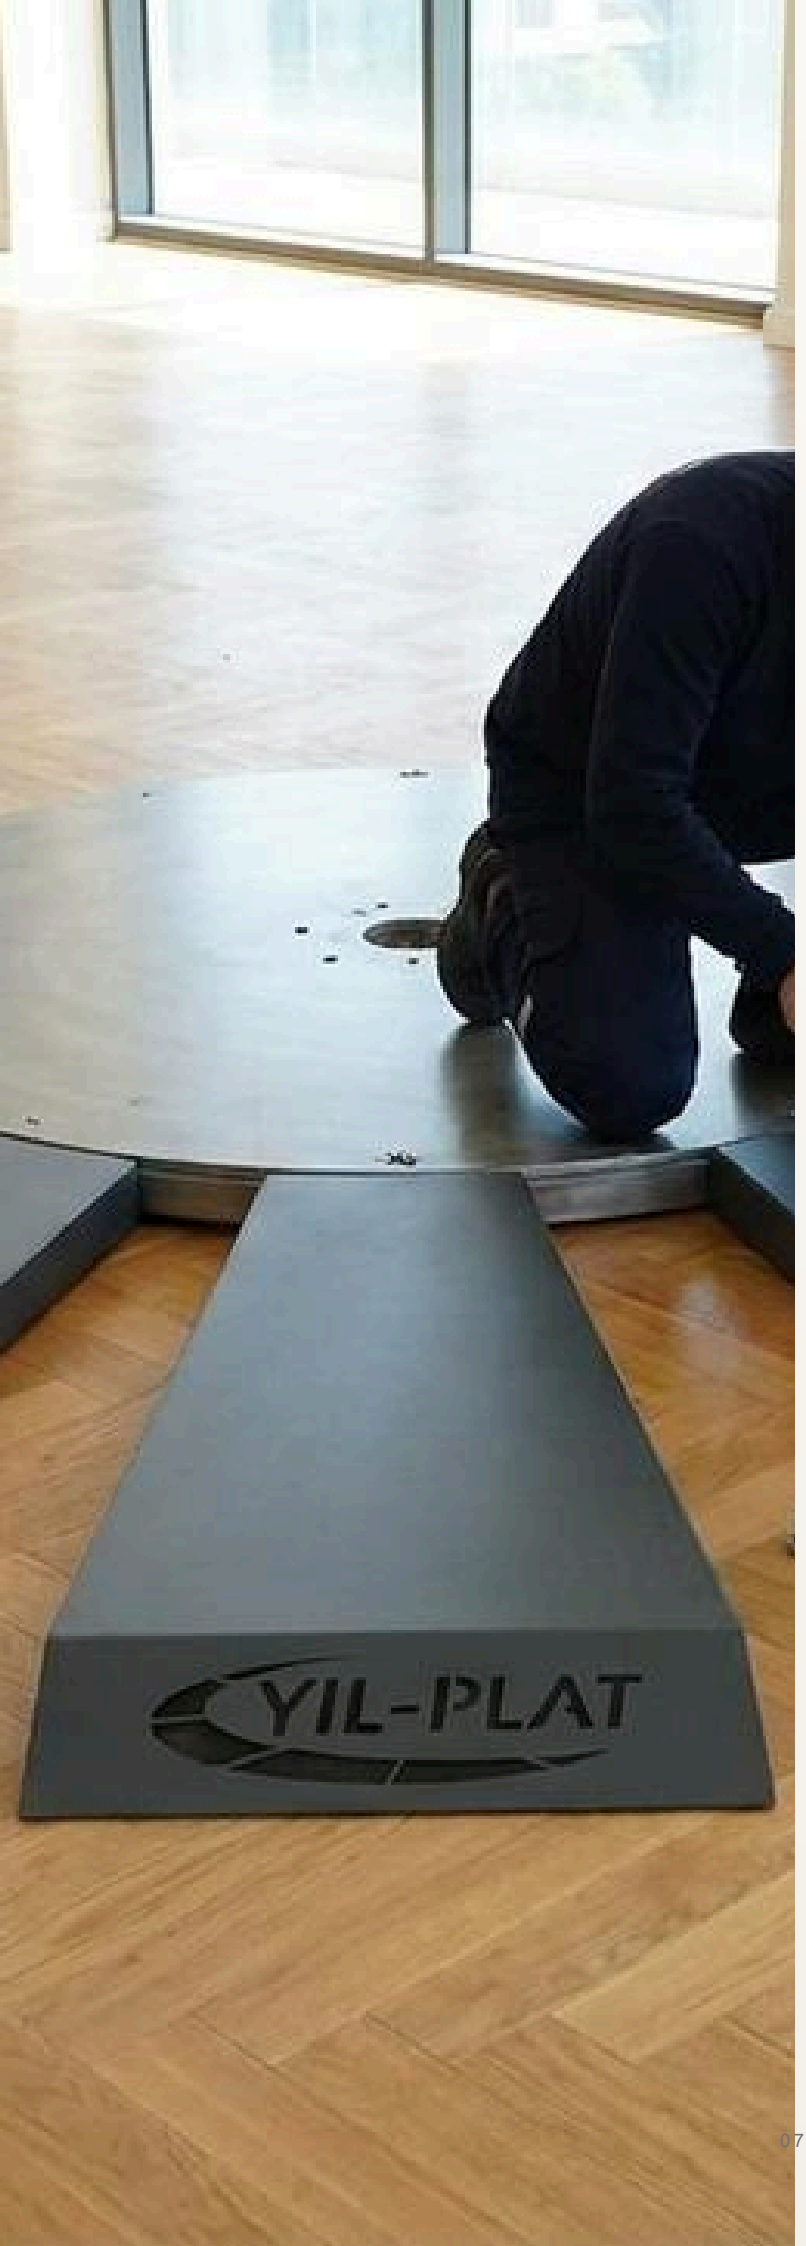
8.5 cm tall. The platform is on the floor. The floor is exactly as it was when you signed the lease. Removed in 45 minutes. Nothing left behind.

THE PLATFORM

A 24-segment polygon. **4.30 m** rotating disc. **5.00 m** with the ramps.

Built in Düzce from **CNC laser-cut sheet steel**, robotically welded and finished by hand. The central disc rotates continuously in either direction; the surrounding ring of trapezoidal ramp segments slopes gently down to floor level.

The leaf-marked **YIL-PLAT** wordmark is laser-etched into the front ramp segment. The polyurethane band on the underside protects every floor surface we have tested it on. Ships in a single **245 × 145 × 85 cm crate**.



INSTALLATION

2.5 hours. Two technicians. One 13 A socket.

The platform arrives on a **single pallet** in pre-assembled modular sections. Carried in by hand. Bolted together — no welding, no drilling on site. Levelled on self-adjusting feet. Plugged into a domestic socket. Tested.

No scaffolding. No mess. No reinstatement bill. **Like IKEA furniture, only built from CNC laser-cut steel and weighing 1,200 kg.**

INSTALL	REMOVAL
2.5 hrs	45 min
POWER	FLOOR PREP
230 V · 13 A	None

Four cars. Four finishes. One platform.

From **manufacturer flagships** to **private collectors**, the platform adapts to the space — the space does not adapt to it.

REAL INSTALLATION · RICH GRUP

Lamborghini Urus

Live YılPlat installation in a high-end European supercar showroom. Polished tile floor, no modification, halo lighting overhead.

SMOOTH WHITE · LIGHT INTERIOR

Rolls-Royce Spectre

For light-toned interiors. The Porsche Germany installation specifies this finish.

SHOWROOM · S&S MOTORS

Bentley Continental GT

Smooth white finish with perimeter LED. A 2,420 kg coupe rotating with ease on a 5,000 kg-rated platform.

TEXTURED BLACK · RESIDENTIAL

Ferrari 296 GTB

Private collector's garage. The platform is removable, which the collector likes.

Six signature finishes. *Any RAL or Pantone on request.*

Every YilPlat surface is custom-applied in our Düzce facility. Choose one of the six signature finishes below, or specify a brand-matched RAL or Pantone reference — at no surcharge on standard finishes.

Textured Grey
RAL 7037

TEXTILE FINISH

BEYOND THE SIX

Brushed steel, mirror polish, leather, marble or stone inlay, and full vinyl wrap with custom imagery — all available on request.

PERIMETER LED RING

Three intensity settings, warm or cool white, RGB or DMX-controllable for events — offered with every finish.

LOGO & WORDMARK

Laser-etched, inlaid in contrasting metal or wood, vinyl-printed or fully wrapped across the rotating disc.

IDENTITY & LIGHT

Your logo.
Your light.
Your colour cycle.

LOGO OPTIONS

House logos and marque identifiers can be: **laser-etched** into the front ramp segment, **inlaid** in contrasting metal or wood, **vinyl-printed** at production grade, or **full wrap-printed** across the entire rotating disc.

LIGHTING SYSTEM

Perimeter LED ring integrated into outer ramp edge. **Three intensity settings**. Warm white, cool white, RGB or DMX-controllable for events. Adjustable timer for automatic operation. Operates day and night.

STANDARD WORDMARK

Every platform carries the **YIL-PLAT** wordmark and leaf icon laser-etched into the front ramp. May be omitted on bespoke commissions.

800+ installations. 12 countries. 11 years.

Many programmes remain confidential. Full reference contacts available under NDA upon request.

Twenty days, door-to-door.

Standard finishes ship within 20 working days of order confirmation. Bespoke finishes add 7-10 days. **Pre-built standard units in stock** for shorter lead times.

Day 1

ORDER

Specification confirmed. **50% deposit**. Production begins.

Day 14

BUILT

Factory acceptance test. Photo & video documentation sent for approval.

Day 18

IN TRANSIT

Bonded haulage Düzce → destination. Customs handled.

Day 20

ON SITE

Two technicians attend. **Install in 2.5 hours.** The platform begins rotating the same day.

Day 21

TRADING

Showroom open. Balance settled. **2-year warranty** active.

What ships with every unit.

Documentation

CE, UKCA and ISO 9001 declarations of conformity · serial-numbered factory acceptance report · operation and maintenance manual.

Shipped with unit

Warranty

2-year manufacturer's warranty. All spare parts (motor, wheels, electrical box) kept in stock at our facility — replacement takes 5 minutes.

2-year coverage

Installation

UK / EU delivery, two-technician install and on-site training — all part of one package. No drilling, no welding on site.

Included

Built to your floor. Priced to your specification.

Pricing indicative for delivery to a single UK / EU address. Local **VAT additional**. Detailed quotation issued within 24 hours of enquiry.

UK LAUNCH OFFER · Introductory pricing for the first UK installations

Bespoke quotation

UK launch consultation

by appointment only

Also: **MotoPlat from £4,750** · Rental from £350/day · Photography service from £180/vehicle.

Built to *European* and *UK* standards. Certified, documented, traceable.

Every YılPlat that leaves our Düzce facility is fully compliant with **CE**, **UKCA** and **ISO 9001:2015**. Conformity declarations, manufacturing serial numbers and test reports are issued with each shipment. For tenders, dealer accreditations and listed-building projects, the complete documentation file is available on request within 24 hours.

CE

CONFORMITÉ EUROPÉENNE

European Union compliance.

Every platform sold into the European market is **fully compliant** with the EU Machinery Directive and Low Voltage Directive (LVD). The CE mark and Declaration of Conformity ship with every unit.

ISO 9001

QUALITY MANAGEMENT SYSTEM

Certified production process.

Our facility is **ISO 9001:2015** certified. Every panel, every motor and every batch is recorded with traceable documentation. Audited annually by an independent certification body. Spare-part lookup is by serial number.

UKCA

UK CONFORMITY ASSESSED

United Kingdom compliance.

Post-Brexit, the **UKCA** mark is mandatory for the UK market. Our technical file is current. Every shipment to the UK is delivered with the UKCA mark plus the full Declaration of Conformity.

DOCUMENTS SHIPPED WITH EVERY UNIT

CE / UKCA **Declaration of Conformity** · ISO 9001 **manufacturing certificate** · serial-numbered **factory acceptance report** · 2-year **warranty certificate** · operation and maintenance manual in English and Turkish.

FOR TENDERS & SPECIFIED PROJECTS

For dealer accreditations, public procurement, listed-building consents or any project requiring detailed compliance evidence, the **full documentation file** (test reports, material certificates, technical specification compliance) is sent within 24 hours of request.

ENQUIRIES

Send us your floor plan. We will send you back the showroom.

A single email with the dimensions of your space, an image of the floor and the vehicle you wish to display is sufficient. Our team will respond **within one working day** with a tailored proposal, indicative pricing and a sample finish swatch sent by courier.
